## 5. FIREFIGHTING MEASURES

Suitable / Unsuitable Extinguishing Media: Use an extinguishing agent suitable for the surrounding fire.  
Specific Hazards from Chemical: At temperatures above 140° F (60° C) acid action on most metals may release hydrogen, a highly flammable and explosive gas.  
Decomposition products may include: carbon dioxide, carbon monoxide, nitrogen oxides and hydrochloric acid.  
Special Protective Equipment: Evacuate personnel to a safe area. Avoid breathing decomposition products. Wear self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Also wear full body protection.

# SAFETY DATA SHEET

Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Provide adequate ventilation.

Other Information: Keep containers cool with water spray.

## 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions: Evacuate area and ventilate. Observe all personal protection equipment recommendations (see Section 8).

Methods and Materials for cleanup: Collect material for disposal. Cleanup remaining material from spill with suitable absorbent. Small spills may be absorbed with non-reactive absorbent (sand) and placed in suitable, covered, labeled containers. For large spills, provide diking or other appropriate containment to keep material from spreading. Prevent large spills from entering sewers or waterways. If diked material can be pumped, store recovered material in compatible drums for recovery or disposal. Prevent entry into sewers, water courses, basements or confined areas.

## 7. HANDLING AND STORAGE

Handling: Avoid contact with skin, eyes and clothing. Avoid breathing vapor or mist. Keep in original container and do not reuse empty containers. Use good personal hygiene practices.

Storage: Store this product in a cool, dry well-ventilated area. Keep container closed when not in use. Do not mix directly with other chemicals. Do not allow product to freeze. Discard empty container in trash. Store in fiberglass, polyethylene, or polypropylene containers. Do not store in metal containers, especially aluminum. Storage in certain metal containers at temperatures above 140° F (60° C) may result in hydrogen gas evolution. Do not store at temperatures above 120° F (48°C).

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTIONS

OSHA permissible exposure limit: No data available.

Appropriate Engineering Controls: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Individual Protection Measures: The usual precautions for handling of chemicals must be observed.

Respiratory Protection: Use a properly fitted, air-purifying or supplied air respirator complying with an approved standard.

Eye Protection: Wear chemical goggles or full face shield.

Skin Protection: Wear chemical resistant, impervious (rubber, nitrile) gloves with an approved standard should be worn at all times when handling chemical products. Protective equipment for the body should be selected based on the task being performed.
